EDUCATION

Misr International University (MIU)

B.Sc. in Computer Science and Software Engineering (CS & SWE)

Cairo, Egypt

2022 – Present

EXPERIENCE

Summer Intern – ICT Division

Agiba Petroleum Company

Aug. 2025

Cairo, Egypt

- Observed enterprise IT infrastructure, network management, and system administration workflows in a large-scale organization
- Learned corporate IT support processes, hardware maintenance, and organizational security practices
- Gained exposure to real-world operational environments and internal technical procedures

Trainee – Software Development (Mobile App Developer)

Digital Egypt Pioneers Initiative (DEPI)

Nov. 2024 – May 2025

Cairo, Egypt

- Built mobile applications following modern SDLC practices and UI/UX principles
- Worked on real-world project scenarios using REST APIs, authentication, and database integration
- Collaborated in agile-based development environments under MCIT supervision

Trainee – Business English Track

Digital Egypt Pioneers Initiative (DEPI)

Nov. 2024 – May 2025

Cairo, Egypt

- Improved professional communication, documentation, and presentation skills for technical environments

Data Entry Specialist

Freelance / Administrative Work

2023 – 2025

Cairo, Egypt

- Handled structured datasets with high accuracy, validation, and reporting using office tools

PROJECTS

Graduation Project – AI Contract Validation System | *React, Spring Boot, OCL, AI Integration*

2026

- Designed the overall system architecture and system design following SDLC principles for a contract validation platform
- Developed RESTful APIs with authentication and authorization and optimized database design
- Integrated OCL rule engine with AI model to detect legal issues and automate contract validation workflow

AI Personal Trainer | *Flutter, Supabase, REST APIs*

2026

- Developed a mobile fitness tracking application with client-server architecture and REST API integration
- Implemented authentication and authorization using Supabase and efficient real-time database design
- Designed dashboards for progress tracking, check-ins, and coach-client interaction

EventEngage | *HTML, CSS, Spring Boot, MySQL, Microservices, Docker, AOP*

2025

- Designed and implemented a microservices architecture with RESTful API design and Docker-based deployment
- Applied AOP for cross-cutting concerns and optimized MySQL database design with role-based access control

Factory Management System | *HTML, CSS, Spring Boot, MySQL, Design Patterns*

2025

- Applied Builder, Factory, Strategy, and MVC patterns as part of the software architecture and system design
- Developed multi-role workflows for material requests, assignments, and announcements with structured database design

PredictKing (Web & Mobile) | *PHP, MySQL, React Native, REST APIs*

2024

- Developed full-stack sports prediction platform with REST API design, leaderboard logic, and news integration
- Built React Native mobile app consuming backend APIs with responsive UI and database integration

E7gzli – Event Ticket Store | *Node.js, Express.js, MongoDB, HTML, CSS*

2023

- Built full-stack ticket platform with REST APIs, role-based access, and MongoDB database schema design

TECHNICAL SKILLS

Languages: Java, C/C++, JavaScript, PHP, SQL (MySQL, PostgreSQL), Kotlin, Dart

Frameworks: Spring Boot, React, React Native, Flutter, Node.js, Express.js

Developer Tools: Git, Docker, VS Code, IntelliJ IDEA, Android Studio, Postman

Technologies: REST APIs, API Design, Database Design, Authentication & Authorization, Microservices Architecture, System Design, Software Architecture, SDLC, Design Patterns, MVC, AOP, Supabase
