EDUCATION

Misr International University

Bachelor of Science in Computer Science, Major: Software Engineering

Cairo, Egypt

Graduated: 2026

EXPERIENCE

Instructor

December 2024 – June 2025

Waleed Academy

Cairo

- Created and delivered educational content covering Computer Science fundamentals and core programming concepts.
- Produced 75+ bilingual (English/Arabic) videos, including full playlists on Linux (from beginner to advanced) and Selenium automation fundamentals.

Cybersecurity Intern

July 2025 – September 2025

Siemens

Cairo

- Gained hands-on experience in OT/ICS cybersecurity through Siemens onboarding, industrial security fundamentals, and scenario-based exercises on ICS architecture and protection.
- Practiced penetration testing with Kali Linux on real PLC hardware, solved CTF challenges, and strengthened Linux skills.

AI and Odoo Development Internship

August 2024 – September 2024

Siemens

Cairo

- Gained hands-on experience in Odoo development, including front-end customization, database optimization, and exposure to machine learning concepts.
- Developed a solid understanding of real-world company workflows, teamwork, and professional communication.

Cross-Platform Mobile App Development Certificate

June 2025 - December 2025

Digital Egypt Pioneers Initiative (DEPI) – MCIT, Egypt

Cairo

- Completed a 6-month intensive program in Flutter & Dart with a parallel Business English course, strengthening both technical and professional communication skills.
- Developed two real-world mobile applications: a tour guide app with categorized locations, trip planning, and Google Maps integration, and a Tour-Guide app that help tourists in all countries to discover places around to visit
- Gained hands-on freelancing experience by delivering many projects on multiple platforms.

SQL Developer Intern

July 2024 - August 2024

Summit Technology Solutions

Cairo

- Worked with MySQL and database systems.
- Gained experience in database design and troubleshooting.

PROJECTS

Graduation Project – AI Contract Validation System | *React, Spring Boot, OCL, AI Integration*

2026

- Designed the overall system architecture and system design following SDLC principles for a contract validation platform
- Developed RESTful APIs with authentication and authorization and optimized database design
- Integrated OCL rule engine with AI model to detect legal issues and automate contract validation workflow.

Fitness Tracker Mobile Application | *Flutter, Dart, Firebase*

2025

- Developed a smart fitness app that generates personalized workout plans with training videos and customized diet plans based on user goals, age, gender, preferences, and allergies.
- Implemented daily meal and workout logging with progress visualization on a dynamic dashboard, along with social features for posting updates, likes, and comments.

Football Analytics Dashboard & Match Prediction Model | *Power BI, Machine Learning*

2025

- Built an interactive Power BI dashboard analyzing global player and club performance to support data-driven scouting, tactical profiling (e.g., pace, passing, defensive metrics), and investment decisions.
- Enabled team performance trend analysis for sponsors and organizations through comparative and historical visualizations.
- Developed machine learning models (Random Forest and Decision Trees) to predict match outcomes and expected goals based on the last five matches' data.

Credit Approval AI System | *Machine Learning, Python, Scikit-Learn*

2023

- Developed a machine learning-based credit approval system to assess loan eligibility.
- Implemented and trained models using algorithms such as Logistic Regression and Decision Trees.
- Preprocessed financial data, handling missing values, outliers, and feature scaling for improved accuracy.
- Validated model performance using fitness metrics like accuracy, precision, recall, and F1-score.

SKILLS

Programming Languages: C++, Python, Java, JavaScript, PHP, HTML/CSS, Dart, Flutter, C#
Frameworks/Tools: Node.js, Spring Boot, Git, XAMPP, MySQL, Firebase, Supabase, MongoDB , Odoo
Systems: Linux, Unix , Kali
Key Strengths: Data Structures, Algorithms, OOP, Problem Solving, Fine Tuning, Machine Learning
Languages: Arabic (Native), English (C1), German (B1)
